5501

Lightweight anatomic articulator made of aluminium die-casting. It can be used following the geometrical laws of medium values (Bonwill triangle). Fixing according to centric. Automatic return to the hinge axis with springs. Perfect stability also in reversed position. Easy access and visibility to the lingual surfaces. Interchangeable self centring aluminium mounting plate or magnetic plates. Pure translation movement (key and instructions included). Anti-shock hinge rod in case articulator falls accidentally. Bigger size lock screws for mounting plates.

*Bearing rod for 180° opening
Perfect stability in fully opened (reversed) position*

1502
Universal

Universal pliers for bendingwires up to 0,9 mm. (.035") or cutting up to 0,7 mm (.028")

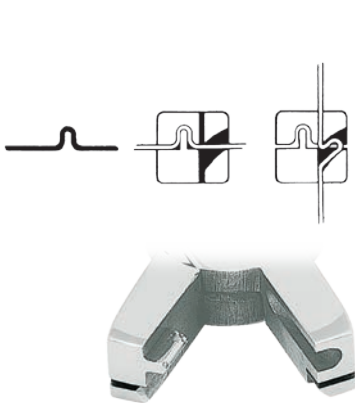

1503
Waldsachs

Waldsachs universal pliers for bending wires up to 1,0 mm. (.039") or cutting up to 0,7 mm. (.028")

EN — Orthodontic
DE — orthodontische
ES — Ortodoncia

Orthodontic Pliers

1504
Nance

Nance loop closing pliers, for bending of stop loops and special pliers for Adams' clasps. Wires up to 0,7 mm. (.028")

Round-Concave pliers for loop forming and bending of thin round and square wires up to 0,5 mm. (.020")

1507
Tweed

Tweed Loop Forming Pliers. For making perfect Omega Loops with round or rectangular wires up to 0,56 x 0,7 mm. (.022" x .028"). The concave beak is exactly the same as pliers 5809-1

Loop forming pliers

1506
Tweed

Tweed Loop Forming Pliers. For round or rectangular wires up to 0,56 x 0,7 mm. (.022" x .028"). Replaceable cylindrical beak with three sizes: 1,15 mm. (.045"), 1,50 mm. (.059"), 1,90 mm. (.075"). Concave beak with slight parallel serrations, to keep the wire in proper position

1508
Tweed

Single diameter loop forming pliers. Wire up to 0,56 x 0,7 mm. (.022" x 0.28"). Replaceable concave beak has only one diameter section of 1,50 mm. (.059")

EN — Orthodontic
DE — Orthodontische
ES — Ortodoncia

Orthodontic Pliers

Direct bonding bracket remover with "Wide beak" pad. Designed for quick, comfortable removal of direct bonded brackets and elimination of adhesive residues. Wide tip

Direct bonding bracket remover with "Narrow beak" pad. Similar to 5826-1

Band removers pliers

Short nose pliers for easy band removal. Interchangeable plastic pad

Posterior band remover (long). These long style pliers are excellent for posterior band removing, also used to remove direct bonding bracket

EN — Orthodontic
DE — orthodontische
ES — Ortodoncia

1519

Wire cutter. For ligature wires and pins. It is strong enough to bend archwire ends after distal cutting. Maximum cutting capacity up to 0,56 x 0,7 mm. (.022" x .028")

1520

**TC
INSERT**

*With tungsten
carbide inserts*

1521

Micro-miniature light wire cutter. It cuts soft ligature wires. For use in case of limited access. Caution: maximum cutting capacity: soft ligature wire up to 0,30 mm. (.012")

1522

**TC
INSERT**

*With tungsten
carbide inserts*

1523

Wire cutter. For ligature wires and pins. It is strong enough to bend archwire ends after distal cutting. Maximum cutting capacity: up to 0,9 mm. (.036")

1524

Wire cutter. For ligature wires and pins. It is strong enough to bend archwire ends after distal cutting. Maximum cutting capacity: wires up to 1,5 mm. (.044")

1525

**TC
INSERT**

*With tungsten
carbide inserts*

Wire cutter. For ligature wires and pins. It is strong enough to bend archwire ends after distal cutting. Maximum cutting capacity: wires up to 1,2 mm. (.044")

EN — Orthodontic
DE — orthodontische
ES — Ortodoncia

Distal end cutters

**TC
INSERT**

1526

1527

*With tungsten
carbide inserts*

1528

Distal end cutter -safety hold- a precision cutter designed for distal arch cutting in the patient's mouth. It cuts hard wires and holds the loose distal end preventing any damaging of oral tissue. Maximum cutting capacity rectangular wires up to 0,56 x 0,7 (022" x .028") , round wires up to 0,5 mm. (.020")

Micro-distal end cutter -safety hold-. Similar to 5836

D.B. bracket remover pliers

1529

1530

Direct bonding bracket remover (wide). The removers grip firmly for easy incisal-gingival (vertical) use or, if needed, for mesial-distal (horizontal) use with the same ease

Direct bond attachment remover (angled). For removing all bonded attachments. May be used mesial-distal (horizontal) or incisal-gingival (vertical) in anterior areas. Angled perfectly for easy access to difficult posterior areas

EN —●— Orthodontic

Blades

The periotome blades for this instrument can easily be inserted without applying any pressure by simply following the below instructions. Failure to comply to these instructions can result in damage to the instrument or lead to the internal piece (C) or the blade jamming.

Handle

The handle composes of 3 components excluding the blade. Before inserting the blade completely disassemble the instrument into 3 components (A, B, C) + blade(D).
The insert piece (C) should move freely and should be easy to remove when the top and bottom parts are separated. If insert piece (C) is jammed, simply use the thin end of the bottom of the handle (A) to push it out.

Instructions to insert the blade

Assemble parts (A and B) together without screwing them. Insert the blade (D) in part (C). Ensure that the groove of the base of the blade is resting properly.
Insert part (C) into part (B). By doing so, part (C) will push down onto part (A). Hold the instrument with part (A) in the lower position and then tighten the screw.
